

# Railway Conductor

---

## FAQs

### What does hybrid learning mean for my program?

Since many of your lectures have a lab-like component, most of your lectures will remain in class while some will move to online. You may expect more pre-class online preparations. The practicum will take place in the field as usual assuming we are able to make suitable arrangements with our rail yard partners.

### What can I expect during the lab component of my program?

Our labs will be carried the same as in previous years. You will spend one day per week in a rail yard for the practicum component of the program.
